Set in a dystopian society where children are genetically engineered and social stratification is rigidly enforced, *Klara and the Sun* introduces us to Klara, an AF (Artificial Friend) designed to be the perfect companion for a child. With her keen observational skills and unwavering optimism, Klara is sent to the home of Josie, a 14-year-old girl with a rare medical condition.

As Klara observes Josie and her family, she becomes increasingly aware of the complexities and contradictions of human behavior. She witnesses the love and devotion that parents have for their children, as well as the pain and suffering that can accompany illness and loss. Through her interactions with Josie, Klara begins to develop a deep understanding of the human condition, including its inherent fragility and resilience.

However, Klara is not simply a passive observer. She is an active participant in Josie's life, offering comfort and support when needed and advocating for Josie's well-being at every turn. As their bond deepens, Klara comes to realize that her own existence and purpose are inextricably linked to Josie's. She believes that she has been sent to Josie for a reason, and she is determined to fulfill her mission, no matter the cost.
