Print length : 448 pages

Sterling Test Prep offers a comprehensive set of MCAT Organic Chemistry Biochemistry practice questions to help you prepare for the Medical College Admission Test (MCAT). These practice questions are designed to cover all of the major topics tested on the MCAT, including:

- The structure and properties of organic molecules
- Organic reactions
- Biochemistry

The practice questions are available in two formats: printable PDFs and online practice exams. The printable PDFs can be downloaded and printed out for you to practice at your own pace. The online practice exams are

timed and scored, so you can track your progress and identify areas where you need to improve.

In addition to the practice questions, Sterling Test Prep also offers a comprehensive MCAT Organic Chemistry Biochemistry course. This course includes:

- 20 hours of video lessons
- 100 practice questions
- A full-length practice exam

The MCAT Organic Chemistry Biochemistry course is designed to help you master the material tested on the MCAT. The video lessons are taught by expert instructors, and the practice questions and exams are designed to help you identify your strengths and weaknesses. With the help of Sterling Test Prep, you can boost your score on the MCAT Organic Chemistry Biochemistry section and improve your chances of getting into medical school.
