

Sterling Test Prep OAT Organic Chemistry Practice Questions: A Comprehensive Review

Overview

The Optometry Admission Test (OAT) is a standardized exam that is required for admission to optometry school in the United States. The OAT consists of four sections: Natural Sciences, Reading Comprehension, Quantitative Reasoning, and Perceptual Ability. The Natural Sciences section includes a subsection on organic chemistry, which accounts for approximately 20% of the total score.

Sterling Test Prep's OAT Organic Chemistry Practice Questions is an essential resource for students preparing for the OAT. This guide provides a comprehensive overview of the organic chemistry concepts tested on the OAT, including detailed explanations of key reactions and mechanisms. With over 300 practice questions, students can test their understanding of the material and identify areas where they need additional support.
